

# ERLANGEN 2014

15-17.July 2014

## Venue

IGCP 596 focuses on Mid-Paleozoic climate and biodiversity. The Mid-Paleozoic conforms to an interval of dynamic long-term climate change, which was accompanied by substantial variations in biodiversity.

Within the frame of a multidisciplinary workshop scheduled for 15-17.July 2014, we will provide hands-on-tutorials on the basics of three of the most relevant disciplines/methods for IGCP 596.

On behalf of the organizing committee of the Short Courses on Stable Isotope Geochemistry, Paleobiology Database and Microfacies analyses of carbonate rocks, we are looking forward to seeing you in Erlangen.

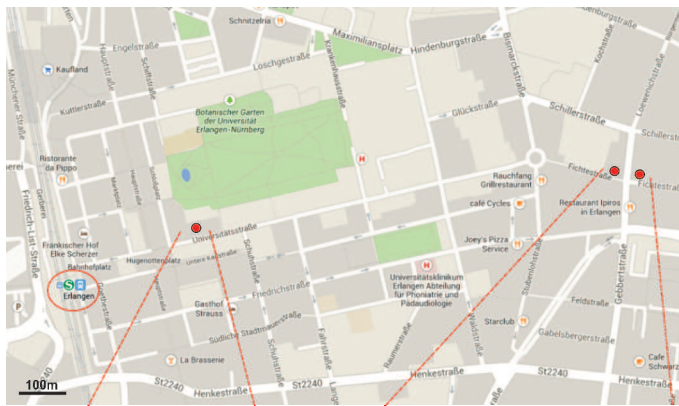

*Michael Joachimski, Wolfgang Kiessling, Axel Munnecke*

## Financial Support

Students and participants from developing countries who are in need of financial support for attending the workshop, please contact with Peter Königshof: [peter.koenigshof@senckenberg.de](mailto:peter.koenigshof@senckenberg.de)

I need an invitation letter for visa support [ ] YES [ ] NO

I would like to attend:

- [ ] Short Course 1: Stable Isotope Geochemistry
- [ ] Short Course 2: Paleobiology Database
- [ ] Short Course 3: Microfacies analyses of carbonate rocks
- [ ] Brewery visit
- [ ] Joint Dinner

Workshop fee for each short course:

- [ ] regular participant: 35 EUR
- [ ] student: 20 EUR
- [ ] brewery visit (for free)

[ ] joint Dinner: 40 EUR; (for 25 persons)  
(please tick: I prefer vegetarian food [ ] YES [ ] NO)

Total: \_\_\_\_\_ EUR (Please put the total sum of your fees)

Payment:
