

# Senckenberg Deutsches Entomologisches Institut

Eberswalder Str. 90, 15374 Müncheberg, Germany

## Hemimetabola Collection: True Bugs – Heteroptera (27.10.2010)

Curator: Dr. Stephan M. Blank, sblank@senckenberg.de, phone: +49/33432/736983730

Technical assistant: Angelika Weirauch, aweirauch@senckenberg.de, phone: +49/33432/736983721

Please note that this is a very incomplete inventory of the Heteroptera collection of the DEI, which displays only the species for which data have been captured up to now! In addition, a number of included data (e.g. spellings) have not yet been verified. We are still working on completing this inventory.

To our experience, a number of type specimens of species described by Breddin have not yet been recognized as such in our collection. Therefore, they have also not been listed in the published type catalog of Gaedike (1971, Beiträge zur Entomologie 21: 79–159). Primarily this seems to concern species, whose description was published after Breddin had already deceased. Relevant type material is not labelled as such, but it may be recognized due to agreement in data given in the description. Additionally, such specimens may be located in our collection, because they have (preliminarily) been identified under the name of the species, which Breddin in his description gives as the closest relative. Also material, for which “Senckenberg” (Frankfurt / Main) is denoted as the depository, may be located in the DEI collection. Please contact us for requests!

<b>SPECIES</b>	<b>SPECIMENS</b>	<b>PA</b>	<b>NA</b>	<b>NT</b>	<b>OR</b>	<b>ET</b>	<b>AU</b>	<b>TYPE MATERIAL</b>
