

## Table

### Data on every specimen used for analysis.

Electr. Suppl. – to:

Jacob, A., Gantenbein, B., Braunwalder, M.E., Nentwig, W., Kropf, C. (2004):  
 Complex male genitalia (hemispermatophores) are not diagnostic for cryptic species in the genus  
*Euscorpius* (Scorpiones: Euscorpiidae).

Org. Divers. Evol. 4(1-2): 59-72.

Sampling sites, sampling dates, collection numbers, species status, and morphological results on hemispermatophores and somatic characters are given. lbspikes: number of spikes on the basal lobe; llspikes: number of spikes of the crown-like structure; ptright: number of pectinal teeth of the right pecten; tvright: number of trichobothria on the ventral side of the right patella.
