

List of valid *Fridericia* species with 2 diverticula per spermatheca.

Electr. Suppl. 5, part 2. – to:

Schmelz, R.M., Collado, R. (2005):

Fridericia larix sp. nov. (Enchytraeidae, Oligochaeta) from Irish soils.

Org. Divers. Evol. 5(1): 85-88.

List of valid *Fridericia* species with 2 diverticula per spermatheca. The list follows Schmelz (2003). Included is *F. heliota*, considered a nomen dubium in Schmelz (2003) because of the poor original description, but redescribed in detail by Rota et al. (2003). Square brackets indicate species with irregular or rare occurrence of 2 diverticula per spermatheca.
