Review	31

BIBLIOGRAPHIA ORIBATOLOGICA

Zusammengestellt von Thomas Schwalbe

In den ABHANDLUNGEN UND BERICHTEN DES NATURKUNDEMUSEUMS GÖRLITZ werden jährlich die neuesten Oribatidenarbeiten veröffentlicht, soweit sie uns bekannt wurden. Die Zusendung Ihrer Publikationen sowie Informationen über gerade laufende Arbeiten sind die Basis dieser Bibliografie. Vorschläge und Kritiken sind zur Verbesserung sehr willkommen. Es wird eine Kostenbeilegung von DM 10.- erbeten. Bitte überweisen Sie auf das Konto 6165 bei: Niederschlesische Sparkasse, BLZ: 850 501 00 (Bitte geben Sie bei „Verwendungszweck“ Bibliographia Oribatologica an). Um Gebühren zu ersparen, schlagen wir vor, die Beiträge für die Nummern 24-26 zusammen zu überweisen, oder Sie schicken die Banknoten in einem Einschreibbrief. Sind Sie an der Bibliographia in Diskettenform interessiert, legen Sie bitte eine Diskette Ihrer Post bei.

In ABHANDLUNGEN UND BERICHTE DES NATURKUNDEMUSEUMS GÖRLITZ latest works on Oribatei are published every year in so far as they have come to our knowledge. The basis of this bibliography is to get your publications as well as informations about your current works. Proposals and criticisms are very welcome for improvement. A cost support of 10.- Deutsche Mark is requested. Please, remit to the account 6165 at Niederschlesische Sparkasse BLZ: 850 501 00 (write at purpose please: Bibliographia Oribatologica). To reduce charges we propose to remit the fees for the numbers 24 up to 26 together, or you send bank notes in a registered letter. If you are interested in receiving the bibliography on a disk, please put one to your mail.

Par les ABHANDLUNGEN UND BERICHTE DES NATURKUNDEMUSEUMS GÖRLITZ sont publiés chaque année les articles les plus récents se référant au travail concernant les Oribatei, tant que nous en avons connaissance. L'envoi de vos publications ainsi que des informations sur des travaux en cours sont la base de cette bibliographie. Des propositions et des critiques visant à l'amélioration sont les bienvenues. Une participation aux frais d'un montant de 10.- Deutsche Mark nous paraît nécessaire. Veuillez verser le paiement à l'intitulé du compte suivant: Niederschlesische Sparkasse BLZ: 850 501 00 Numéro du compte: 6165 (Comme but d'utilisation veuillez écrire: Bibliographia Oribatologica). Pour économiser des taxes, nous vous proposons de virer ensemble les montants pour les numéros 24-26, ou bien vous envoyez les billets de banque par lettre recommandée. Si vous êtes intéressé à la Bibliographia sur disquette, veuillez joindre une disquette à votre courrier.

В РАЗРАБОТКАХ И ДОКЛАДАХ МУЗЕЯ ПРИРОДОВЕДЕНИЯ ГЕРЛИЦ (ABHANDLUNGEN UND BERICHTE DES NATURKUNDEMUSEUMS GÖRLITZ) ежегодно опубликовываются, насколько они нам известны, новейшие орбатидные работы. Присылка вашей публикаций и информации о актуальной работе являются основой этого Библиографии. Предложения и критики очень приятны для улучшений. Просим участие расходов о 10 DeM на счёт 6165 у Niederschlesische Sparkasse, BLZ: 850 501 00. (Пишите, пожалуйста, на исполнованной цели Bibliographia Oribatologica), или высыпаете в заказном банкноты. Если Вы интересуетесь Библиографией на диске, пожалуйста, положите один в вашем почте.

Nomina nova: Here all new oribatid names are listed as far as they came to our knowledge. Their validity couldn't be examined here. Behind the nomina nova you find in brackets the number of the corresponding title in our card index (see: Publications) with page reference to the beginning of the description.

** behind author's names: These titles were found as a report only (they are not quoted in Cyrillic).

Russian titles: The names of authors of Russian titles are transliterated after the schedule in the Bibliographia Oribatologica No 6 (1973), or the spelling, used by the author himself, is used. The titles of Russian publications are translated into English. They are written in Cyrillic only, if we got the original without any translation.

Dear Acarologists,
In the last few years the production and sending costs rose. We beg for your comprehension, that Bibliographia Oribatologica in future will be sent to colleagues only, who return the enclosed order form filled.

Adress: Dr. Th. Schwalbe, Staatliches Museum für Naturkunde, F.R. Germany 02806 Görlitz, PF 425

Nomina nova

New species / New subspecies

<i>Acaroceras africanus</i>	Mahunka, 1991	(5108:	567)
<i>Afronothrus arboreus</i>	Ramani & Haq, 1992	(5205:	207)
<i>Allogalumna sinornata</i>	Mahunka, 1992	(5242:	673)
<i>Apotritia walkeri</i>	Norton & Lions, 1992	(5246:	285)
<i>Arthrovertex leucaeana</i>	Corpuz-Raros, 1991	(5152:	143)
<i>Berniniella grandis</i>	Gordeeva, 1991	(5207:	40)
<i>Berniniella nana</i>	Gordeeva, 1991	(5207:	40)
<i>Berniniella rossica</i>	Gordeeva, 1991	(5207:	40)
<i>Brachioppiella (Gressitloppia) magna</i>	Lee & Subias, 1991	(5103:	24)
<i>Brachioppiella (Gressitloppia) minima</i>	Lee & Subias, 1991	(5103:	25)
<i>Brachioppiella (Brachioppiella) paranasalis</i>	Lee & Subias, 1991	(5103:	22)
<i>Brachioppiella (Gressitloppia) pseudohigginsi</i>	Lee & Subias, 1991	(5103:	27)
<i>Brachychthonius parahirtus</i>	Subias & Gil, 1991	(5106:	4)
<i>Brachychthonius pseudoimmaculatus</i>	Subias & Gil, 1991	(5106:	4)
<i>Carabodes chandleri</i>	Reeves, 1992	(5248:	2042)
<i>Carabodes erectus</i>	Reeves, 1992	(5248:	2042)
<i>Carabodes interruptus</i>	Reeves, 1992	(5248:	2048)
<i>Carabodes pentasetosus</i>	Reeves, 1992	(5248:	2048)
<i>Carabodes polyporellus</i>	Reeves, 1991	(5208:	2925)
<i>Cepheus takasago</i>	Aoki, 1991	(5210:	75)
<i>Ceralozetes guadarramicus</i>	Pérez-Iñigo, 1990	(5131:	14)
<i>Chaunoproctellus rugosus</i>	Mahunka, 1992	(5242:	673)
<i>Corynoppia kosarovi marilima</i>	Pérez-Iñigo jr., 1990	(5130:	35)
<i>Cosmochthonius (Cosmochthonius) minifoveolatus</i>			
	Gil, Subias & Candelas, 1991	(5219:	57)
<i>Cosmochthonius monegrensis</i>	Pérez-Iñigo jr., 1991	(5132:	120)
<i>Cosmochthonius (Cosmochthonius) spinosus</i>	Gil, Subias & Candelas	(5219:	61)
<i>Cosmognatha cassolai</i>	Bernini/ Baralli & Avanzali, 1992	(5200:	467)
<i>Ctenobelba parafoliata</i>	Pérez-Iñigo jr., 1990	(5130:	30)
<i>Deflectamerus crassiseliger australis</i>	Aoki, 1991	(5210:	75)
<i>Dolicheremaeus almerodai</i>	Corpuz-Raros, 1991	(5152:	138)
<i>Dolicheremaeus infrequens taiwanus</i>	Aoki, 1991	(5210:	75)
<i>Dolicheremaeus mariehammarae</i>	Corpuz-Raros, 1991	(5152:	139)
<i>Dorycranous dickersoni</i>	Moraza, 1990	(5099:	3)
<i>Dyobelba biclavata</i>	Wang & Norton, 1993	(5224:	66)
<i>Epidamaeus fragilis</i>	Enami & Fujikawa, 1989	(5156:	16)
<i>Epidamaeus pyrenaeicus</i>	Pérez-Iñigo jr., 1991	(5087:	128)
<i>Epidamaeus verrucata</i>	Enami & Fujikawa, 1989	(5156:	13)
<i>Eupelops torulosus macroporus</i>	Pérez-Iñigo jr., 1991	(5087:	138)
<i>Flagrosuctobelba meridionalis</i>	Kahwash, Subias & Ruiz, 1991	(5220:	211)
<i>Fuscozetes tetricus</i>	Seniczak, 1993	(5237:	169)
<i>Galumna clavata</i>	Pérez-Iñigo jr., 1991	(5133:	89)
<i>Galumna coronata</i>	Mahunka, 1992	(5242:	673)
<i>Galumna glabra</i>	Pérez-Iñigo jr., 1991	(5133:	88)
<i>Galumna longiclava</i>	Pérez-Iñigo jr., 1991	(5133:	90)
<i>Galumnella apiculata</i>	Mahunka, 1992	(5242:	673)
<i>Graptoppia mussardi</i>	Mahunka, 1992	(5242:	673)
<i>Haplochthonius graecus</i>	Mahunka, 1992	(5242:	673)
<i>Hemileius humeralis</i>	Pérez-Iñigo jr., 1991	(5087:	136)

<i>Hemileius laticlava</i>	Pérez-Iñigo jr., 1991	(5133:	85)
<i>Heminothrus (Heminothrus) oromii</i>	Morell & Subías, 1991	(5221:	84)

<i>Tricheremaeus travei</i>	Miko, 1993	(5263:	177)
<i>Trichogalumnella hauseri</i>	Mahunka, 1992	(5242:	673)
<i>Uroppia hainardorum</i>	Mahunka, 1992	(5242:	673)
<i>Xenillus moonsani</i>	Choi & Aoki, 1993	(5258:	24)

New Genera

<i>Apotritia</i>	Norton & Lions, 1992	(5246:	285)
Typ. spec.: <i>A. walkeri</i>	Norton & Lions, 1992		
<i>Chaunoproctellus</i>	Mahunka, 1992	(5242:	673)
Typ. spec.: <i>C. rugosus</i>	Mahunka, 1992		
<i>Mantiguera carus</i>	Balogh & Mahunka, 1992	(5254:	159)
Typ. spec.: <i>M. baggioi</i>	Balogh & Mahunka, 1992		
<i>Minoricoppia</i>	Pérez-Iñigo jr., 1990	(5130:	34)
Typ. spec.: <i>M. balearica</i>	Pérez-Iñigo jr., 1990		
<i>Multimedioppia</i>	Subias, 1989	(5105:	123)
Typ. spec.: <i>M. mirena</i>	Subias, 1989		
<i>Neosteganacarus</i>	Balogh & Mahunka, 1992	(5254:	159)
Typ. spec.: <i>N. angulatus</i>	Balogh & Mahunka, 1992		

<i>Nortonacarus</i>	Balogh & Mahunka, 1992	(5254:	159
Typ. spec.: <i>N. veleriae</i>	Balogh & Mahunka, 1992		
<i>Onazeles</i>	Bugrov, 1991	(5107:	137
Typ. spec.: <i>O. umbellatus</i>	Bugrov, 1991		
<i>Protozetomimus</i>	Pérez-Íñigo, 1990	(5023:	397
Typ. spec.: <i>P. acutirostris</i> (<i>Ceralozetes</i>)	Mihelčíč, 1957		
<i>Senilochthonius</i>	Mahunka, 1992	(5242:	673
Typ. spec.: <i>S. baobah</i>	Mahunka, 1992		
<i>Suctobelbata</i>	Gordeeva, 1991	(5207:	40
Typ. spec.: <i>S. nova</i>	Gordeeva, 1991		
<i>Transorribates</i>	Pérez-Íñigo, 1992	(5187:	89
Typ. spec.: <i>Protoribates latus</i>	Mihelčíč, 1956 (It's a proposal for the invalid genus <i>Protoribates</i> Berlese, 1908)		
<i>Trichogalumna</i>	Mahunka, 1992	(5242:	673
Typ. spec.: <i>T. hauseri</i>	Mahunka, 1992		

New Subgenera

<i>Trichacaroceras</i>	Mahunka, 1991	(5108:	567)
Typ. spec.: <i>Acaroceras africanus</i>	Mahunka, 1991		

Conferences

XI. International Colloquium on Soil Zoology
August 10-14, 1992 in Jyväskylä, Finland

The „Abstracts“ contain concerning the oribatid mites:

- Badejo, M. A. & Lasebikan, B. A.:
„Influence of hexazinone residue on soil mites in a semihumid tropical climate.“
(Poster)
- Banerjee, S.:
„Ecophysiology of acari in a forest of Suri (Birbhum), West Bengal, India.“ (Poster)
- Bellido, A. & Deleporte, S.:
„Macro- / mesofaunal interactions in a deciduous litter: Field experiment on Diptera/
Oribatid mites trophic relations.“ (Poster)
- Convey, P.:
„Slow growth rates and extended life span - the life cycle of an Antarctic free living mite.“
(Poster)
- Drouk, A. Ya.:
„Structure and composition of microarthropod communities of bogs.“ (Poster)
- Fukuyama, K. & Itoh, M.:
„Comparison of Oribatei (Acari: Cryptostigmata) communities in soil and needle litter
among differently aged *Cryptomeria japonica* plantation in Japan.“
- Golosova, L. D.:
„Oribatid mites of the Primorsky Krai deciduous forests.“ (Poster)
- Kaczmarek, M. & al.:
„Diversity of grassland vegetation and its effect on soil fauna and decomposition
Processes.“ (Poster)
- Kaneko, N.:
„Composition of feeding types in oribatid mite communities in forest soils.“ (Poster)

- Kriveluzkij, D. A.:
„Soil fauna as bioindicator of radioactive pollution in Chernobyl nuclear power station zone.“ (Poster)
- Laskova, L. M.:
„Influence of mineral fertilizer and macro fungi on the structure of soil macrofauna.“ (Poster)
- Miko, L. & Kováč, L.:
„Effect of fly-ash contamination on the soil microarthropod abundances in East-Slovak Agroecosystem.“ (Poster)
- O'Connell, T. & Bolger, T.:
„An analysis of the structure of the microarthropod assemblages in fungal fruiting bodies.“
- Parra, X. & al.:
„Structure of an edaphic microarthropod community in a mediterranean holm-oak wood.“ (Poster)
- Rosche, O.:
„Influence of Nitrogen fertilizer on the structure of soil microarthropod communities in an agro-ecosystem.“ (Poster)
- Roth, M.:
„Investigations on lead in soil invertebrate food chains in a forest ecosystem, contaminated by Pb-emmission from car exhausts.“ (Poster)
- Sanyal, A. K.:
„Soil pollution and soil inhabiting oribatid (Acari: Oribatida) communities in Calcutta.“ (Poster)
- Sarkar, S.:
„Oribatid mites as bioindicators.“ (Poster)
- Schwalbe, T.:
„Investigations on Oribatei in SO₂-immission influenced spruce forests of the Osterzgebirge mountains.“ (Poster)
- Seniczak, S. et al.:
„Arboreal and soil mites as bioindicators of air pollution in Scots pine forests by a nitrogen factory at Włocławek.“ (Poster)
- Sgardelis, S. P.:

II. Symposium of EURAAC 1992
August 31 - September 6, 1992

The programme contains concerning the oribatid mites:

Alekseev, A. N.: „Pathomorphological changes in oribatid mites in polluted area of Lenin-grad region.“

Miko, L.: „Succession of oribatid mite community in different litter type on the field edge.“

Murphy, P. W.: „Mite - higher plant associations among the Oribatida.“

Niedbała, W.: „Supplement to the classification of Phthiracaroidea (Acari, Oribatida, Eupterygota).“

Piffl, E.: „Chelicere of Gustaviidae.“

Schuster, R.: „Ecomorphology of littoral mites.“

Woas, S.: „The problem of phylogenetical relationship within higher Oribatei.“

Conferences in the next future
The IXth International Congress of Acarology

will be held at the Ramada University Hotel and Conference Centre, Columbus, Ohio, U.S.A. 17-22 July 1994. Of importance for oribatologists may be

Proposed Symposia: Acarine communities and environmental perturbations, Genetic systems in Acari, Interactions between mites and other arthropods, Phylogenetic perspectives on mite ecology, Population dynamics of plant-inhabiting mites: theory and experiment, Semichemicals in acarine interaction, Proposed Workshops: Molecular methods in acarological studies, Development of culture techniques for acari,

Submitted Paper and Poster sessions: Genetics and population biology, Mites and honey bees, Mites in soil habitats, Morphology and phylogeny

For further information and addition of your name to the mailing list, please write to: The secretary, IX International Congress of Acarology, Acarology Laboratory, Museum of Biological Diversity, The Ohio State University, 1315 Kinnear Road, Columbus, OH 43212, U.S.A.

Review

Günter Haumann (1991): „Zur Phylogenie primitiver Oribatiden (Acari: Oribatida).“
[Orig.: deutsch]

dvV-Verlag, Graz, Austria. ISBN 3-7041-0194-X

This thesis on the phylogeny of Oribatida bases on the consequent application of phylogenetic systematics. A theoretical introduction presents the rules of argumentations in the sense of W. Hennig. These reflections point out the theory of cognition which allows to establish a cladogram or a congruent classification of „Primitive oribatid mites“ in the sense of Grandjean and later taxonomists. In contrast to Grandjeans approach on a phylogenetic system of oribatids, where very often taxa are based on additions of plesiomorphous characters (the status of characters has not been reflected), Haumann tries to reconstruct monophyletic groups on synapomorphous characters only. The transparency of his method and his theoretical basis allows him to give the statement: „As every step of decision-finding in the course of phylogenetic reconstruction has to be demonstrated explicitly, the results stay testable and open to critics.“

The main tool of analysis is a large list of morphological characters of the described taxa (genera and higher), presented in a simple codation. On each of the characters and the morphological differentiations there is a critical discussion whether it might be regarded as convergency. There are a lot of problematic decisions, but most of them seem to me acceptable. In such cases the consequences of different interpretations have been discussed, allowing sufficient transparency of the argumentations.

The main results may be presented by citing the abstract: „The primitive oribatids and the Macropyolina are paraphyletic groups; the higher oribatids (Circumdehiscentiae) constitute a monophyletic taxon. The two fundamental sister-groups of the Oribatida are not Macropyolina and the Brachypyolina (the latter are also monophyletic) but the Palaeosomata and the new taxon Monofemorata nov. The Monofemorata split into the sister-groups Enarronota and the new taxon Novoribatida nov. The ptychoid body-articulation has not been evolved once but three times, in the Mesoplophoridae, Protophoridae and Eupycytima.“

The phylogenetic relationships within the „primitive oribatids“, being a paraphyletic group, and the relationships within some smaller monophyla (Palaeosomata, Mesoplophoridae, Brachychthoniidae, Lohmanniidae and Euphthiracaroidea) are presented in cladograms and in sufficient comments. The reviewer comes to the result that this phylogenetic approach is the best published up to now on the whole „primitive oribatids“, being a consequent and convincing hypothesis of oribatid phylogeny, which is based more on the gigantic and imposing work of Grandjean than on some recent systematic designs using more or less typological characters for classification. However, acceptable phylogenetic analyses in recent literature have been integrated in this phylogram.

There are a lot of problems left unsolved, though. One of these, the phylogenetic concept is no taxonomic system up to now. The problem of systematic categories cannot be answered by Hennig's phylogenetic cladograms, and probably for this reason taxonomy has been faded out by Haumann. It is important to adopt a taxonomic concept to this phylogenetic one in future. Each higher taxon than species has to be based on arguments of monophyly! But there are no general criteria as convincing as those for phylogenetic cladograms.

This book deserves being translated into English, because it should be read by everybody dealing with oribatid systematics and taxonomy. It deserves being discussed critically as a basis for a new start towards a phylogenetic system of oribatids.

Gerd Weigmann, Berlin
